EX82 Provides Maintenance-Free Eurotunnel Surveillance Five Years Running

Extreme CCTV announces that its EX82 cameras have been providing reliable, maintenance-free surveillance at Eurotunnel five years running. EX82's NEMA4 sealed housing enables continuous video vigilance amidst Eurotunnel's dusty and saline environment, which defeats conventional CCTV cameras. Recently upgraded for enhanced imaging performance, today's EX82 Infrared Imager™ incorporates Black Diamond™ technology, which produces up to 250ft High Fidelity™ night vision for 24/7 monitoring. The unit's patented dual sensor design now delivers 550 TVL day/night imaging for powerful video interrogation. A ruggedized, integrated imaging solution, EX82 has required no upkeep throughout its deployment at Eurotunnel. Visit www.ExtremeCCTV.com for more information.

Extreme CCTV designs, manufactures and markets extreme application, all-environment high-performance CCTV surveillance camera systems and infrared illuminators for technical surveillance throughout the world. Extreme CCTV's security cameras and night vision equipment have reached end users on all seven continents. For more information on Extreme CCTV products, visit www.ExtremeCCTV.com.

Patent Pending. Specifications are subject to change without notice. © Extreme CCTV Inc 2008.
