## Extreme Releases New Infrared Imagers™ Powered by Black Diamond™

Extreme CCTV announces its new line of Infrared Imagers™, an elite suite of precision-engineered cameras powered by Black Diamond™ Night Vision, designed and calibrated to provide high-performance 24/7 surveillance. Security professionals can confidently and accurately specify critical CCTV projects using the performance parameters of every Infrared Imager, which Extreme provides for each of the four surveillance levels of the DCRI criteria - Detection, Classification, Recognition and Identification. The new Infrared Imager combine high-performance optics and Black Diamond High-Fidelity™ illumination to enable the most advanced level of night vision imaging available today. Surpassing the capabilities of conventional day-night cameras, Infrared Imagers are ideal for important security projects including perimeter surveillance, asset protection and intrusion detection.
